

HACCP Now – Solution Selection

HACCP solutions available:

HACCP Now has a HACCP solution to meet the needs of every size of food business and food safety consultancy business. Our solutions are designed to deliver three main goals:

- **Make HACCP easy to document**
- **Ensure HACCP is simple to implement and manage**
- **Save time and money**

Each solution is described briefly below and a Solution Selection Chart can be found on page 2. overleaf.

HACCP Now Live

This version of HACCP Now is designed for any type of food businesses that has to implement HACCP. HACCP Now Live has a smart knowledge base built into it that helps you make key HACCP decisions and produce your food safety management system in a fraction of the normal time.

HACCP Now Live provides all the tools needed to document, implement and train staff on HACCP procedures and can link directly into the company's Quality Management System. Full documentation examples are included along with the built in knowledge base.

HACCP Now Live also manages raw material and finished product specifications, suppliers, customer agreements and training records. It manages scheduled tasks and even cleaning records. These features are not available in the Standard Version of HACCP Now.

HACCP Now Live is made up of software that runs on your Windows PC and a database that is hosted on our server. This enables our team of Consultants to work with you when you need us and make sure that your system complies with the food safety legislation and that you are fully trained in its use. This also means that no matter what happens to your PC your information is safely backed up on our server.

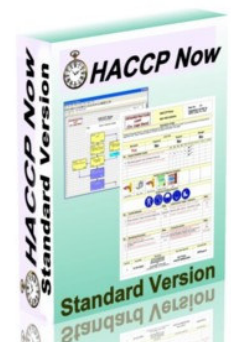

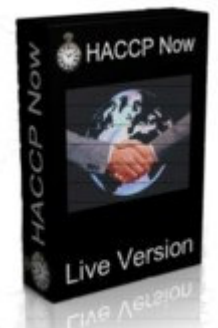

If you have no experience in HACCP then we will take you through everything from initial system setup to the principles of HACCP and how to use the software to best effect.

Price: From £225 set up fee plus £25 per month hosting and support fee.

HACCP Now Standard

This version of HACCP Now is designed for any type of food business that have staff who are experienced in HACCP and who are also computer literate enough to take a new software application and learn to use it for their needs. It provides all the tools needed to document, implement and train staff on HACCP procedures and can link directly into the company's Quality Management System. Full documentation examples are included along with the built in knowledge base.

Price: from £199 once off license fee

Please see the selection chart overleaf for more detail on the differences between these solutions.
